Step

Decision

Role

Note

A customer request host to do Crypto deposit

Host needs to send a wallet to deposit crypto

Host sends list of Crypto Supported

Host needs to send a wallet to deposit crypto

What are the process? Will we create an account?

New Patron

- Doesn't have KYC check
- Doesn't have gaming account

Existing Patron

- Has KYC check
- Has gaming account

Potential Future States

GCM

Frax API

GCM initiate Wallet/Link Generation and Send to Customer

Okta SSO

Login to Frax

Find Customer/Create Customer

User Database

KYC and Data

What data we need to push

Question where to HOST the solution?

We need to define desirable level of security for "Wallet share" process

Current Bank transaction details shared with customer as a Bank account number

Frax wallet generation feature is in Prototype State

Frax platfrom generates Link with Address and Exchange Rate for X minutes which comes from Prime Broker

Not secure MVP

Generate and Wallet address without exchange rates

Method of generation is persistent wallet or link to customer, no time based available address

Wallet Generation Process

Host/System Sends Link/Wallet to the customer

Address/Link

Important!!!

Does this address belong to WYNN or to FRAX?

Will affect KYC sharing process. If Wynn-then-Wynn is counterparty of Broker and for broker client is WYNN. If FRAX then Wynn needs to share customer data with Frax and then with Broker.

Customer Sends Money to the Wallet

Funds hit the wallet

Funds/Wallet Check

Funds Clear

Funds Dirty

If Funds are Clear -

This process is active is we show exchange quote to customer

QUOTE

BTC/ETH/...

Stable

BTC

ETH

...

What do we do send money back or keep it for investigation

What we going to do with old wallet?

What is happening with Dirty Address

Create New

Remove Flag Process?

The easiest way is to bounceback the transaction and regenerate a wallet for a next one

USDC

FRXUSD

USDT

...

Quote

Quote Time and Quote Type

Credit Quote - Really Good Quote

Just a good Quote

Quote is not Traded Fee

No Fee (but incl in Exchange Risks)

Process happens on Frax Side

Prime Broker

Generates Exchange Quotes

No have to share customer data

If Wynn is a owner of wallet shared with customer then Wynn is counterparty

EP & FalconX & Maybe Fireblocks internal swap?

Zero FEE Swap

Frax will provide zero fee stable swap

Exchange to Stable (the same which is in Wynn Treasury Account

Fireblocks

BitGo

Stripe

Custodian Wallet Provider

Wynn Treasure Account (WTA)

Need to choose which stablecoin we will use

Wire to Bank

Define Process Finance

Frax will have access to withdraw funds from WTA

Payouts

Frax Routing

WTA

Stable

Coin

Broker

If WYNN couterparty then here should be a WYNN wallet

Customer

Customer

Customer sees WTA wallet as sender

Customer sees Broker wallet as a sender

Win/Lose Scenario Payouts

Shoud in out be the same currency

Shoud we use the same address from which we received a transaction

No

Collect Payout Address during buy in

Collect Payout Address during payout

Define Process and Tech

Yes
